MultiClient Drives Performance

Healthy Cash Flow From Operations

Highlights Q3 2011

- Revenues of \$339.9 million, up 15% from Q3 10
- EBITDA of \$153.2 million, up 12% from Q3 2010
- Contract revenues of \$164.9 million with a corresponding contract EBIT margin of 4%
- Offset by strong MultiClient revenues of \$144.2 million, up 38% from Q3 2010, driven by high GeoStreamer allocation
- Net cash flow from operating activities of \$149.6 million, up 127% from Q3 2010
- External Data Processing revenues of \$27.5 million
- Order book of \$501 million, up 2% from Q3 2010
- EPS impacted by foreign exchange movements causing non cash financial and tax charges
- Full year 2011 EBITDA expectation increased to approximately \$525 million

“Customer interest for the Gulf of Mexico has been strong in the quarter driven by oil companies positioning themselves to explore the region further. In particular the upcoming lease sale in Western Gulf of Mexico has triggered the strong MultiClient late sales we have delivered. Late sales were also good in other regions. Our MultiClient GeoStreamer campaigns in the North Sea continued the trend of the second quarter, generating very good pre-funding revenues.

Marine Contract EBIT margin was impacted by less GeoStreamer capacity being allocated to contract activity, increased project costs and productivity variances. These factors have lead us to revise our expectation of full year Marine Contract EBIT margin to approximately 10%. For the general market we see flat prices. Bidding for the 2012 North Sea season has started, but it is too early to see any directional change in rates. Given our performance year to date and the continued strength of our MultiClient activities, we have increased our expectation for full year 2011 EBITDA to approximately \$525 million.”

1) Financial information for the full year 2010 is derived from the audited financial statements as presented in the 2010 Annual Report which have been restated due to a change in accounting policy as discussed on page 4.

The unaudited numbers for Q3 2010 and the nine month period ended September 30, 2010 have been restated accordingly.

2) Net impairment charge for the nine months period ended September 30, 2010 and the full year 2010 was \$79.1 million.

In Q3 2011, revenues for Petroleum Geo-Services ASA (“PGS” or “the Company”) were 15% higher than in Q3 2010, mainly due to higher MultiClient, data processing and other revenues, partially offset by marginally lower contract revenues. Late sales were the strongest contributor to the revenue improvement.

The reported income tax expense in Q3 2011 was high, at \$16.7 million, due to the impact of foreign exchange movements and losses in countries where deferred tax benefit are not recognized. The strong appreciation of the US Dollar in the quarter causes tax assets in Norway and other countries to be translated to their US Dollar functional currency at a lower dollar value. The non cash deferred tax expense for Q3 2011 totaled \$21.0 million while the estimated current tax for the quarter was a net benefit of \$4.3 million (see Income Tax Expense and Tax Contingencies paragraph for more details).

³⁾ Percentage of total 3D steamer capacity measured in steamer utilization.

The Company has deliberately chosen to allocate a majority of its GeoStreamer capacity to MultiClient projects to better capitalize on PGS fleet and technology for overall better results.

Contract revenues decreased by \$1.4 million in Q3 2011, compared to Q3 2010. The EBIT margin on Marine contract acquisition work was approximately 4% in Q3 2011, down from 7% in Q2 2011 and 25% in Q3 2010. Marine contract EBIT margins will fluctuate from quarter to quarter. The low margin in Q3 2011 is primarily due to adverse productivity variances and reduced profitability on certain long term contracts. The EBIT margin is also impacted by less GeoStreamer capacity being allocated to contract activity, higher project costs, especially on surveys offshore West Africa, increased fuel prices and a weak US dollar.

MultiClient pre-funding revenues in Q3 2011 were higher than in Q3 2010, due to more capacity being allocated to GeoStreamer MultiClient projects and strong interest for GeoStreamer surveys in Europe, where the Norwegian North Sea campaigns in particular carry a high pre-funding rate. Compared to Q3 2010, pre-funding revenues were higher primarily in Europe albeit somewhat lower in Brazil. The Company now expects to allocate approximately 30%

of active vessel time to MultiClient for full year 2011, up from 25% previously indicated.

Pre-funding revenues in Q3 2011 corresponded to 99% of capitalized MultiClient cash investments, excluding capitalized interest, which is in line with the Company's full year guidance, compared to 139% in Q3 2010.

MultiClient late sales were strong in Q3 2011, driven by strong sales in the Gulf of Mexico, where oil companies are positioning themselves for the upcoming western lease sale in December 2011. In addition, late sales were higher in Europe and Brazil, but lower in West Africa and Asia Pacific, compared to Q3 2010.

Higher capitalized cash investment in the MultiClient library in Q3 2011, compared to Q3 2010 primarily reflects more 3D GeoStreamer capacity allocated to MultiClient and a higher general cost level.

External Data Processing revenues has grown significantly in the first nine months of 2011, compared to the first nine months of 2010, led by growth in the Brazil data processing center, in the Houston international market and in Asia Pacific. Capacity has grown more than the revenue numbers indicate, over the last eighteen months megacenter computing capacity has more than tripled and global geophysical staff has increased by double digits in the same period. The growth is driven by high technology solutions, such as GeoStreamer and depth processing, in all regions.

Operating expenses (before depreciation, amortization and impairments) increased by \$26.7 million in Q3 2011, compared to Q3 2010, as a result of increased salaries and social expenses, driven by increased headcount to meet growth, in addition to changes in currency exchange rates, increased fuel/travel/consumables and decreased capitalization of costs during major overhaul of vessels, partly offset by increased cash costs capitalized to MultiClient library.

The order book totaled \$501 million at September 30, 2011, including \$25 million of committed pre-funding on scheduled MultiClient projects and the estimated value of the OptoSeis agreement with Petrobras, compared to \$489 million at September 30, 2010 and \$579 million at June 30, 2011.

Technology

| In USD millions | 3 rd quarter | | Nine months | | Full year |
|------------------------|-------------------------|-------|-------------|-------|-----------|
| | 2011 | 2010 | 2011 | 2010 | 2010 |
| R&D cost gross | 14.5 | 8.0 | 32.8 | 25.4 | 34.9 |
| Capitalized dev. costs | (5.0) | (3.4) | (10.5) | (9.6) | (13.2) |
| Net R&D costs | 9.4 | 4.6 | 22.2 | 15.8 | 21.8 |

The R&D costs in Q3 2011 mainly relate to the core business activities of marine seismic acquisition and processing, but a significant amount is related to the new businesses of electromagnetic ("EM") and fiber-optics permanent monitoring systems. The increase in gross R&D costs in both Q3 2011 and the first nine months of 2011, compared to the first nine months of 2010 are primarily driven by increases in development activity for Towed EM, along with increases in marine seismic projects.

The increase in capitalized amounts in Q3 2011 compared to Q3 2010 is primarily a result in additional investments to develop larger and more powerful Towed EM acquisition systems. Similarly, the increase in Towed EM accounts for the majority of the increase for the first nine months of 2011, compared to the first nine months of 2010. Streamer control system developments comprise the other main component of the capitalized development cost.

Depreciation and Amortization

| In USD millions | 3 rd Quarter | | Nine months | | Full year |
|----------------------------------------|-------------------------|--------|-------------|--------|-----------|
| | 2011 | 2010 | 2011 | 2010 | 2010 |
| Gross depreciation | 55.9 | 47.8 | 157.6 | 139.0 | 190.0 |
| Capitalized depreciation to MC library | (14.6) | (13.8) | (44.7) | (35.4) | (42.6) |
| Amortization of MC library | 71.8 | 49.3 | 185.3 | 119.7 | 197.6 |
| Depreciation and amortization | 113.2 | 83.3 | 298.2 | 223.3 | 344.9 |

The increase in gross depreciation in Q3 2011, compared to Q3 2010 is explained by increased investments in GeoStreamer and entry of the 2D vessel *Sanco Spirit* to the PGS fleet in Q4 2010, partially offset by de-rigging of the *Beaufort Explorer* during Q1 2011.

As disclosed in the Q1 2011 report the Company has implemented a change of its accounting policy for costs relating to major overhauls of vessels with effect from January 1, 2011. The change is made to better reflect the economic reality, reduce volatility and align the accounting to more common industry practice and general practice among vessel owning companies. Following this change, PGS capitalizes all costs relating to major vessel overhauls and depreciates relevant assets over the estimated periods between major overhauls, which typically range from three to five years. The former policy was to expense substantially all such costs when incurred. This change in accounting is expected to result in a \$20-30 million increase of both EBITDA and capital expenditures for the full year 2011. The change will also impact depreciation expense, with an estimated increase of approximately \$15 million for the full year 2011, compared to the old policy. Reported periods prior to January 1, 2011, have been restated accordingly (see Note 3 and 17).

Amortization of the MultiClient library as a percentage of MultiClient revenues was 50% in Q3 2011, compared to 47% in Q3 2010. The increase in amortization rate is primarily due to a slightly higher amortization rate applicable to the pre-funding revenues on ongoing projects.

Interest Expense

| In USD millions | 3 rd Quarter | | Nine months | | Full year |
|------------------------------------------|-------------------------|--------|-------------|--------|-----------|
| | 2011 | 2010 | 2011 | 2010 | 2010 |

| Interest expense | (9.3) | (11.1) | (31.2) | (35.8) | (47.0) |

The decrease in gross interest expense in Q3 2011 compared to Q3 2010 primarily reflects a reduction of interest bearing debt.

Other Financial Income

| In USD millions | 3 rd Quarter | | Nine months | | Full year |
|--------------------------------------------------|-------------------------|-------|-------------|------|-----------|
| | 2011 | 2010 | 2011 | 2010 | 2010 |

| Other financial income | 10.4 | 1.4 | 17.4 | 9.5 | 13.9 |

In Q3 2011 PGS participated in the establishment of the E&P focused investment company Azimuth primarily by contributing existing equity holdings in smaller E&P companies. PGS owns 45% of Azimuth and has entered into a cooperation agreement whereby PGS provides certain services to Azimuth and whereby Azimuth is invited to invest in any future equity settlement that PGS may receive as payment for its library or services. In Q3 2011 transactions between PGS and Azimuth resulted in other operating income of \$4.4 million.

The gain in other financial income in Q3 2011 was primarily due to interest income, a gain from the sale of shares in Cove Energy, and to the gain of shares contributed to Azimuth.

Other Financial Expense

| In USD millions | 3 rd Quarter | | Nine months | | Full year |
|-----------------------------------------|-------------------------|-------|-------------|--------|-----------|
| | 2011 | 2010 | 2011 | 2010 | 2010 |

| Other financial expense | (5.3) | (4.4) | (14.3) | (17.0) | (17.6) |

Other financial expense is primarily attributable to the repurchase of \$51.4 million of nominal value of the

Company's convertible notes at a price of 98.5% of par, and a fair value adjustment of warrants in Geokinetics preferred stock due, to reduction of share price.

The Company has not made further write downs of the convertible loan to SeaBird in Q3 as it, based on available information, expects the loan to be repaid or restructured at a fair value corresponding to current book value.

Currency Exchange Gain (Loss)

There was a currency exchange loss of \$10.3 million in Q3 2011, compared to a gain of \$20.8 million in Q3 2010. The Company holds foreign currency positions to balance its operational currency exposure. These positions are not accounted for as hedges, but marked to market at each balance sheet date together with receivables and payables in non-US currencies, generally causing the short term effect to be positive when the US dollar depreciates. In Q3 2011, the foreign currency translation of the deposit held in Brazilian Real relating to PGS' exposure for the municipal service tax ("ISS") in Brazil (see next paragraph) had a significant impact due to a significant weakening of the Brazilian Real compared to US Dollar.

Income Tax Expense and Tax Contingencies

In Q3 2011, the income tax expense was \$16.7 million compared to \$14.9 million in Q3 2010. The estimated current tax expense in Q3 2011 was a benefit of \$4.3 million compared to an expense of \$11.9 million in Q3 2010. Deferred tax expense in Q3 2011 was \$21.0 million compared to \$3.0 million in Q3 2010. The reported tax expense is negatively impacted by foreign exchange movements and losses in countries where deferred tax benefit are not recognized.

The Company has substantial deferred tax assets in different jurisdictions, predominantly in Norway. Deferred tax assets recognized in the consolidated statements of financial position amounted to \$192.4 million as of September 30, 2011, compared to \$222.3 million as of September 30, 2010.

The Company has an ongoing dispute with the tax office of Rio de Janeiro in Brazil related to ISS on the

sale of MultiClient data relating to years 2000 and onwards. The issue has been disclosed in annual and quarterly reports since 2005. As of September 30, 2011, the Company estimates the total exposure to be approximately \$164 million, including possible penalties and interest.

In October 2010, the Company deposited Brazilian Real 110 million (\$65 million) with the Rio de Janeiro court so as to be able to file a lawsuit to seek confirmation that the sale of MultiClient data is not subject to ISS. The lawsuit relates to periods after 2005, which had not yet been assessed, as well as to future transactions. Going forward, PGS will continue depositing amounts relating to future transactions. In March 2011, PGS replaced a bank guarantee of Brazilian Real 49 million (approximately \$29 million) for the earliest exposure years with a deposit. The purpose was to reduce costs. Since the time of the deposits, the Brazilian Real has depreciated against the US Dollar causing a significant reduction of the US Dollar value of both the deposits and the exposure it is intended to cover. Total deposits, including deposits for transactions after October 2010, totalled \$92 million as of September 30, 2011.

Because the Company considers it more likely than not that the contingency will be resolved in its favor, no provisions have been made for any portion of the exposure. Amounts deposited are held on an interest bearing bank account with Banco do Brazil and will be released to PGS if and when a positive final ruling is awarded, which may take several years. The deposits are reported as long-term restricted cash.

With its multi-national operations, the Company is subject to taxation in many jurisdictions around the world with increasingly complex tax laws and interpretations. As previously disclosed, the Company has identified issues in several jurisdictions that could eventually make it liable to pay material amounts in taxes relating to prior years. The Company recognises liabilities for anticipated tax issues based on estimates of whether it is probable that additional taxes will be due.

| Total | 40.9 | 56.9 | 232.8 | 162.5 | 223.5 |

¹⁾ Includes capital expenditure incurred, whether paid or not.

The main capital expenditures in Q3 2011 were seismic in sea equipment, primarily GeoStreamer, and costs in relation to the new builds (see paragraph below for more details).

New Builds

In February 2011, PGS ordered two 5th generation Ramform vessels, with an option for another two vessels, from Mitsubishi Heavy Industries Ltd. Final agreements were signed in April. The vessels are the first in a new generation of Ramform vessels. Agreed deliveries of the two first vessels are in 2013, and progress is according to plan, while the options for delivery of the two additional vessels in 2015 must be declared by mid April 2012.

The estimated total cost of each of the new generation Ramform is approximately \$250 million, including commissioning and a comprehensive seismic package, but excluding capitalized interest cost.

The agreement with the shipyard provides for payment based on five defined milestones, with 50% payable at delivery. In-sea seismic equipment is procured by PGS separately from the shipbuilding contract.

Liquidity and Financing

Net cash provided by operating activities was \$149.6 million in Q3 2011, compared to \$65.9 million in Q3 2010. The increase relates primarily to higher EBITDA in addition to improvements in working capital.

At September 30, 2011, cash and cash equivalents amounted to \$176.9 million, compared to \$216.0 million at June 30, 2011 and \$168.0 million at September 30, 2010. In Q3 2011, PGS bought back \$51.4 million of its convertible notes.

Restricted cash amounted to \$93.3 million at September 30, 2011, compared to \$107.4 million at June 30, 2011 and \$16.4 million at September 30, 2010. The increase in restricted cash from Q3 2010 is primarily due to a deposit of amounts corresponding to approximately \$65 million in Q4 2010 and \$29 million in Q1 2011 related to law suits with the Rio de Janeiro court to seek confirmation that sale of MultiClient data in Brazil is not subject to ISS tax (see Income Tax Expense and Tax Contingencies paragraph for more details). The reduction from Q2 2011 is primarily due to a strong depreciation of the Brazilian Real in Q3 2011. The company has foreign currency contracts in place to economically hedge approximately 65% of the deposited amount.

As of September 30, 2011, \$470.5 million was outstanding under the Term Loan B maturing in 2015. There are no drawings on the \$350.0 million revolving credit facility maturing in 2015, but \$2.4 million of a subfacility to it is used for a standby letter of credit.

In Q3 2011, the Company bought back \$51.4 million of nominal value of its convertible notes at a price of 98.5% of par. PGS now owns \$106.9 million of the convertible notes, representing 26.7% of the outstanding notes issue. The net remaining outstanding nominal amount of the convertible notes is \$293.1 million.

The total interest bearing debt, including capital leases, was \$750.6 million as of September 30, 2011 compared to \$796.5 million as of June 30, 2011 and \$787.3 million as of September 30, 2010.

Net interest bearing debt (interest bearing debt less cash and cash equivalents, restricted cash and interest bearing investments) was \$421.6 million as of September 30, 2011 compared to \$420.8 million as of June 30, 2011 and \$602.9 million as of September 30, 2010.

For the cancelled Arrow vessels, NB 532 and NB 533, approximately EUR 7 million per vessel with the addition of interest is still outstanding from Factorias

Vulcano. Factorias Vulcano has entered into Spanish bankruptcy proceedings. Arrow has been granted security over a future payment by Armada Seismic to Factorias Vulcano for NB 533 in the amount of EUR 10 million. In Q2 2011 the security was disputed. In addition, Arrow has a registered a lien in the NB 533 vessel for an amount of approximately EUR 7 million with addition of interest, which the opposing party claims is disputable.

The Company is subject to interest rate risk on debt, including capital leases. The risk is managed through using a combination of fixed and variable rate debt, together with interest rate swaps where appropriate, to fix the borrowing cost. As of September 30, 2011 the Company had approximately 78% of its debt at a fixed interest rate. The weighted average cash interest cost on gross debt reflects an interest rate of approximately 4.3%, including credit margins paid on the debt. The swap agreements used to fix the interest rate on \$300 million of the debt mature from mid 2014 through to Q1 2015 and are matched against the Term Loan B. The swap agreements are accounted for as interest rate hedges as long as the hedging criteria are met.

Given the Company's interest rate swaps and cash holdings, for every one percentage point hypothetical increase in LIBOR, the annual net interest expense on the Company's debt, including capital leases, would not materially change.

The credit agreement for the \$600 million (remaining balance \$470.5 million) Term Loan B and the \$350 million revolving credit facility contains certain terms that place limitations on the Company. The revolving credit facility contains a covenant whereby total leverage ratio (as defined) cannot exceed 2.75:1. At September 30, 2011 the total leverage ratio was 1.41:1. The credit agreement generally requires the Company to apply 50% of excess cash flow to repay outstanding borrowings when the senior leverage ratio exceeds 2.00:1 or if total leverage ratio exceeds 2.50:1 for the financial year.

believes or anticipates will or may occur in the future. These statements are based on various assumptions made by the Company, many which are beyond its control and all of which are subject to risks and uncertainties. The Company is subject to a large number of risk factors including but not limited to the demand for seismic services, the demand for data from our MultiClient data library, the attractiveness of our technology, changes in governmental regulations affecting our markets, technical downtime, licenses and permitting, currency and fuel price fluctuations, and extreme weather conditions.

Contracts for services are occasionally modified by mutual consent and in certain instances may be cancelled by customers on short notice without compensation. Consequently, the order book as of any particular date may not be indicative of actual operating results for any succeeding period.

For a further description of other relevant risk factors we refer to the Annual Report for 2010. As a result of these and other risk factors, actual events and actual results may differ materially from those indicated in or implied by such forward-looking statements.

Subsequent Events

On October 1, 2011, PGS decided to withdraw its two members of the Board of Directors of SeaBird in order to avoid any speculation related to conflict of interest in the upcoming decisions that will be put forward to the Board of SeaBird as a part of the ongoing restructuring of the company.

Outlook 2011

Based on the current operational forecast and with reference to the aforementioned risk factors, PGS expects full year 2011 EBITDA of approximately \$525 million.

Capital expenditure, including new builds, is estimated at approximately \$275 million.

MultiClient cash investment of approximately \$200 million with a pre-funding level of approximately 100%.

Revenues by Quarter
2009 - 2011
MUSD

EBITDA (2) by Quarter
2009 - 2011
MUSD

Notes: (2) EBITDA, when used by the Company, means income (loss) before income tax expense less, currency exchange gain (loss), other financial expense, other financial income, interest expense, income (loss) from associated companies, other operating income, impairment of long-lived assets and depreciation and amortization. See Support Tables for a more detailed discussion of and reconciliation of EBITDA to income before income tax expense (benefit). EBITDA may not be comparable to other similarly titled measures from other companies. PGS has included EBITDA as a supplemental disclosure because management believes that it provides useful information regarding PGS' ability to service debt and to fund capital expenditures and provides investors with a helpful measure for comparing its operating performance with that of other companies. EBITDA is considered a non IFRS measure. EBITDA for 2009 has not been restated to reflect the change in policy.

Petroleum Geo-Services ASA
Notes to the Interim Consolidated Financial Statements - Third Quarter 2011

Note 1 - General

In December 2009, the Company entered into an agreement to sell PGS Onshore business ("Onshore") to the US-based Geokinetics. The transaction was closed February 12, 2010. The results for Onshore are included in discontinued operations in the consolidated statements of operations.

The Company is a Norwegian limited liability company and has prepared its consolidated financial statements in accordance with International Financial Reporting Standards ("IFRS") as adopted by the EU. The consolidated interim financial statements have been prepared in accordance with International Accounting Standards ("IAS") No. 34 "Interim Financial Reporting". The interim financial information has not been subject to audit or review.

- (1) Certain reclassifications have been made to prior period amounts to conform to the current presentation, due to restatement as a result of changes to a policy (see note 3). Financial information for the full year 2010 is derived from the audited financial statements as presented in the 2010 Annual Report, which has been restated for the change in accounting policy. The unaudited numbers for the quarter and the nine months ended September 30, 2010 have been restated accordingly.
- (2) EBITDA, when used by the Company, means income before income tax expense (benefit) less, currency exchange gain (loss), other financial expense, other financial income, interest expense, income (loss) from associated companies, other operating income, impairments of long-lived assets and depreciation and amortization. EBITDA may not be comparable to other similar titled measures from other companies. PGS has included EBITDA as a supplemental disclosure because management believes that it provides useful information regarding PGS' ability to service debt and to fund capital expenditures and provides investors with a helpful measure for comparing its operating performance with that of other companies.

Note 2 - Basis of presentation

The consolidated interim financial statements reflects all adjustments, in the opinion of PGS' management, that are necessary for a fair presentation of the results of operations for all periods presented. Operating results for the interim period is not necessary indicative of the results that may be expected for any subsequent interim period or year. The interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements for the year ended December 31, 2010.

The accounting policies adopted in the preparation of the interim consolidated financial statements are consistent with those followed in the preparation of the Company's consolidated financial statements for the year ended December 31, 2010 with the exception of the change in accounting policy as described in note 3. See Note 2 to the Consolidated Financial Statements in the 2010 Annual Report for information of the Company's significant accounting policies.

Note 3 - New standards and policies adopted in 2011

None of the new accounting standards that came into effect on January 1, 2011 had a significant impact in the first nine months of 2011.

From January 1, 2011 the Company changed the policy for recognition of costs incurred in connection with major overhaul of vessels. Under the new policy the directly attributable costs incurred in connection with major overhaul are capitalized and depreciated over the estimated period till the next similar overhaul. The former policy was to expense such costs when incurred. The change is made to better reflect the economic reality, reduce volatility and align the accounting to industry practice and practice among other vessel owning companies. The change in policy is applied for all reported periods, including periods prior to January 1, 2011. The restatements of periods prior to January 1, 2011 has been changed in third quarter 2011 as a result of a change in lifetime of one of the major overhaul assets. See note 17 for presentation of adjustments made in the restated periods.

Note 4 - Segment information

The chief operating decision maker reviews Contract and MultiClient as separate operation segments, however, as the two operating segments meets the aggregation criteria in IFRS 8 "Operating Segments", these are presented combined as Marine.

"Other" includes Corporate administration costs and unallocated Global Shared Resources costs (net). Financial items and income tax expense are not included in the measure of segment performance. Onshore is presented as discontinued operations and is not included in the tables below.

Note 5 - Research and development costs

Research and development costs, net of capitalized portion were as follows for the periods presented:

| | Quarter ended | | Nine months ended | | Year ended |
|---------------------------------------|--------------------|--------------------|--------------------|--------------------|-------------------|
| | September 30, 2011 | September 30, 2010 | September 30, 2011 | September 30, 2010 | December 31, 2010 |
| Research and development costs, gross | \$ 14 469 | \$ 8 014 | \$ 32 762 | \$ 25 403 | \$ 34 945 |
| Capitalized development costs | (5 035) | (3 445) | (10 530) | (9 562) | (13 154) |
| Total | \$ 9 434 | \$ 4 569 | \$ 22 232 | \$ 15 841 | \$ 21 791 |

Note 6 - Depreciation and amortization

Depreciation and amortization consists of the following for the periods presented:

| | Quarter ended September 30, | | Nine months ended September 30, | | Year ended December 31, |
|-------------------------------------------------|--------------------------------|-----------|------------------------------------|------------|----------------------------|
| | 2011 | 2010 | 2011 | 2010 | 2010 |
| | (In thousands of dollars) | | | | |
| Gross depreciation | \$ 55 947 | \$ 47 767 | \$ 157 620 | \$ 138 951 | \$ 189 955 |
| Depreciation capitalized to MultiClient library | (14 587) | (13 772) | (44 740) | (35 395) | (42 631) |
| Amortization of MultiClient library | 71 792 | 49 283 | 185 327 | 119 702 | 197 584 |
| Total | \$ 113 152 | \$ 83 278 | \$ 298 207 | \$ 223 258 | \$ 344 908 |

The Company amortizes its MultiClient library primarily based on the ratio between the cost of surveys and the total forecasted sales for such surveys. In applying this method, surveys are categorized into four amortization categories with amortization rates of 90%, 75%, 60% or 45% of sales amounts. Each category includes surveys where the remaining unamortized cost as a percentage of remaining forecasted sales is less than or equal to the amortization rate applicable to each category.

The Company also applies minimum amortization criteria for the library projects based generally on a five-year life. The Company calculates and records minimum amortization individually for each MultiClient survey or pool of surveys on a quarterly basis. At year-end, or when specific impairment indicators exist, the Company carries out an impairment test of individual MultiClient surveys. The Company classifies these impairment charges as amortization expense in its consolidated statement of operations since this additional, non-sales related amortization expense, is expected to occur regularly.

Note 7 - Impairments of long-lived assets

Impairments of long-lived assets consists of the following for the periods presented:
