<thead>
<tr>
<th>2018 Highlights</th>
<th>Revised PGS strategy</th>
</tr>
</thead>
</table>
| **Centralized, Simplified & Streamlined** | - Completed reorganization process  
- Sold OptoSeis to GeoSpace  
- Operated a flexible fleet of vessels |
| **Became cash flow positive after debt servicing** | - Delivered on key target for 2018  
- First year with new organization |
| **Improving MultiClient Performance** | - Record MultiClient late sales  
- Increasing investment  
- Diverse client base |
| **Revised PGS strategy** | - Profitability and cash flow  
- Conservative approach to balance sheet  
- Strong focus on MultiClient |
| **PGS - the only full service provider** | - Meeting clients needs in all aspects of towed streamer seismic  
- Flexible business models with tailored solutions |
Achieved Positive Cash Flow After Debt Amortization in 2018

- Revenues in 2018 were in line with 2017, despite significant idle time
  - Record high MultiClient late sales

- Delivered on key KPI for 2018 of becoming cash flow positive after debt amortization

- Cash flow generation expected to increase in 2019
  - Lower debt repayments
  - Improving market fundamentals
Sales & Services Split in Two:
New Ventures and Sales & Marketing

- Former EVP Sales & Services, Sverre Strandenes retired from PGS by year-end 2018
- Sales & Services divided in two;
  - New Ventures is responsible for all new and ongoing MultiClient projects
  - Sales and Imaging promotes, markets and sells MultiClient data library, contract acquisition and imaging solutions
- Berit Osnes and Nathan Oliver are recruited internally
PGS Strategy:
Marine Seismic Market Leadership Through Full Service Offering

### Financial Strategy
- Profitability before growth
- Return on Capital Employed
- Capital structure to sustain future downturns

### Business Strategy
- MultiClient focus
- 4D leadership
- Reduce turnaround time
- Joint acquisition and imaging approach
- R&D focus on imaging and acquisition solutions
- Leveraging PGS fleet productivity and technology

Leveraging digitalization to improve efficiency and reduce cost
Market Perspectives: GDP Growth Expected to Continue – Current Macro Uncertainty

- The current macro environment is uncertain
  - Length of upcycle experienced since the financial crisis
  - Result of US – China trade negotiations
  - Impact on world growth and energy demand

- World GDP expected to double by 2040 and growth rate likely to be similar as for the last 25 years
  - Driven by increased prosperity in the developing world

Source: ExxonMobil 2018 Outlook for Energy
Market Perspectives: Energy Demand Continues to Increase

- Oil and gas demand expected to grow annually from 2010 to 2040

- Oil and gas accounts for a majority of energy demand and is also expected to be the dominant energy source in 2040

- Decline rates from producing field is significant and increased shale production is not enough to compensate
  - Offshore exploration and production has to increase

Sources: Top graph from BP Energy Outlook 2018 (Evolving Transition scenario); Bottom graph from ExxonMobil 2018 Outlook for Energy: a view to 2040

**Includes wind, solar, geothermal, biomass and biofuels.
Market Perspectives:
Oil Companies Cash Flow Supports an Improving Seismic Market

- Oil companies generate significant cash flow despite oil price correction
  - They are expected to continue strong cash generation in 2019 and 2020
- Oil price declined during latter part of 2018
  - Have recovered from the 50s and is expected to increase further

Source: FactSet and SB1 Markets. Included in sample are ENI, BP, Total, Repsol, Chevron, Exxon and ConocoPhillips.
Market Perspectives:
E&P Spending Expected to Increase in 2019 – Also Offshore

- Total 2019 E&P spending expected to continue to increase, compared to 2018 spending level
- Larger incremental increase for offshore spending than overall E&P spending
- Continued CAPEX discipline to be expected

Source: Average estimates from E&P spending reports published by Barclays, DNB, Pareto Securities and SB1 Markets.
Market Perspectives:
Seismic – Early Cycle Indicator with Potential for More

- For the second consecutive year seismic spending has increased Y-o-Y
- MultiClient has already benefitted, while contract activity has lagged
- Contract market trends
  - Higher activity
  - Higher prices
  - Increased share of 4D
- Expect contract pricing to be materially higher in 2019 vs. 2018
2019 Marine Seismic Supply Expectations

- Average streamer capacity in 2019 is close to 50% lower than average streamer capacity in 2013
  - Some competitors will add capacity and others will remove capacity in 2019
  - Expect 2019 supply to stay flattish vs. 2018

- Flexible winter capacity will cause seasonal supply swings

Supply/demand balance expected to improve in 2019

Source: PGS internal estimates.
2019 Guidance

- Group gross cash cost of ~USD 550* million, excluding deferred steaming

- MultiClient cash investments ~USD 250* million
  - More than 50% of 2019 active 3D vessel time allocated to MultiClient

- Capital expenditures of ~USD 85 million

*Adoption of IFRS 16 from January 1, 2019 results in a reduction of gross cash cost of approximately USD 50 million compared to 2018, partially offset by a reduction in capitalized MultiClient cash investment expected to be approximately USD 20 million. See Note 16 of the Q4 and preliminary full year 2018 results earnings release for more details.
Summary

- Achieved key KPI for 2018 of positive cash flow after debt servicing
- Record high MultiClient late sales in 2018
- Seismic market in recovery
  - Improving cash flow and increasing offshore CAPEX among oil companies
  - Expected to continue in 2019
- PGS will focus on profitability, return on capital employed and reposition the capital structure to sustain future downturns
- Will focus on the MultiClient business, improve 4D position and image what we acquire

Taking leadership position through fully integrated offering
This presentation contains forward looking information

Forward looking information is based on management assumptions and analyses

Actual experience may differ, and those differences may be material

Forward looking information is subject to significant uncertainties and risks as they relate to events and/or circumstances in the future

This presentation must be read in conjunction with the press release for the fourth quarter and preliminary full year 2018 results and the disclosures therein
2018 Highlights: MultiClient Revenue Growth

- Q4 Segment Revenues of USD 245.2 million
  - EBITDA of USD 154.5 million

- Full year Segment Revenues of USD 834.5 million
  - EBITDA of USD 515.9 million

- Growing the MultiClient business
  - 22% revenue growth Y-o-Y
  - Record late sales of USD 371.9 million
  - MultiClient investments of USD 277.1 million

- Total leverage ratio reduced to 2.58:1

- Agreement to sell Ramform Sterling

* For definition of Segment Reporting numbers see Note 14 of the unaudited fourth quarter 2018 results, released on January 31, 2019.

The accompanying unaudited financial information has been prepared under IFRS. This information should be read in conjunction with the unaudited fourth quarter 2018 results, released on January 31, 2019.
Q4 2018 Operational Highlights

- Low vessel utilization negatively impacting acquisition driven revenues
- Total Segment MultiClient revenues of USD 197.8 million
  - Pre-funding revenues of USD 34.2 million
  - Pre-funding level of 85% on USD 40.2 million of MultiClient cash investment
  - Late sales revenues of USD 163.6 million
- Contract revenues of USD 41.0 million
Q4 2018 pre-funding revenues driven by North America

Late sales revenues dominated by Europe and South America
Seismic Streamer 3D Fleet Activity in Streamer Months: Vessel Utilization*

- 37% active vessel time in Q4 2018
  - Two (of eight) 3D vessels warm stacked over the winter season
  - Significant idle time due to project delays

- Will incur some idle time in Q1 2019
  - Primarily due to changes to a project in South America

* The vessel allocation excludes cold-stacked vessels.
Order Book

- Order book of USD 163 million at December 31, 2018
  - Impacted by changes to the large contract in South America

- 3D vessel booking for next three quarters of 40 vessel months*:
  - Q1 19: 17 vessel months
  - Q2 19: 16 vessel months
  - Q3 19: 7 vessel months

- Expect strong utilization in Q2/Q3
  - High bidding activity for contract work
  - Significant planned MultiClient projects for the North Atlantic summer season not included in booking

*As of January 28, 2019.
Gross cash costs are defined as the sum of reported net operating expenses (excluding depreciation, amortization, impairments, deferred steaming and Other charges) and the cash operating costs capitalized as investments in the MultiClient library as well as capitalized development costs.

Following the reorganization of PGS, effective January 1, 2018, more office facility and sales costs are classified as "Selling, general and administrative costs."

- Graph shows gross cash costs excluding the effect of steaming deferral
- Q4 2018 gross cash costs sequentially lower
  - Down to six operated vessels from October
  - Cost impact of standby/idle time

Full year 2018 gross cash costs ended at USD 601.6 million

*Gross cash costs are defined as the sum of reported net operating expenses (excluding depreciation, amortization, impairments, deferred steaming and Other charges) and the cash operating costs capitalized as investments in the MultiClient library as well as capitalized development costs. Following the reorganization of PGS, effective January 1, 2018, more office facility and sales costs are classified as "Selling, general and administrative costs."

- **Q4 2018 cash flow from operating activities of USD 117.4 million**
  - Strong improvement of Q4 and full-year 2018 compared to 2017
  - Includes payment of severance and other restructuring provisions of USD 2.8 million in Q4 (USD 36.0 million for the full year)

The accompanying unaudited financial information has been prepared under IFRS. This information should be read in conjunction with the unaudited fourth quarter 2018 results released January 31, 2019.
The accompanying unaudited financial information has been prepared under IFRS. This information should be read in conjunction with the unaudited fourth quarter 2018 results released on January 31, 2019.

- Liquidity reserve of USD 159.5 million
  - In September the RCF was reduced from USD 400 million to USD 350 million in accordance with the extension and amendment of the facility agreed in November 2016
  - 2018 Senior Notes (USD 26 million) repaid in December

- Balance sheet restated January 1, 2018 due to IFRS 15
  - Carrying value of MultiClient surveys in progress increased by USD 155.7 million
  - Accrued revenues and other receivables decreased by USD 70.9 million, and deferred revenues increased by USD 160.1 million
  - Shareholders’ equity decreased by USD 75.3 million

IFRS 16 – Accounting for Leases

- Will be implemented effective January 1, 2019 – No restatement of historical periods
  - Implementation effect recorded as an adjustment to the January 1, 2019 Balance Sheet

- Leasing arrangements are reported as assets (and depreciated over the lease term) and debt (with payments being reported as interest cost and installments)

- PGS will
  - Recognize assets and liabilities for all leases with a term of more than 12 months
  - Exclude the service element

Financial Strategy

Profitability before growth

Focus on profitability and cash flow
Debt reduction prioritized over growth

Return on Capital Employed

ROCE targeted to be higher than cost of capital over the cycle

Capital structure to sustain future downturns

Debt reduction from cash flow in an improving market
Targeting a net debt level not to exceed USD 500-600 million

Competitive Return on Capital – Lower Financial Leverage

*) Amount does not include debt relating to capitalized leases (Ref. IFRS 16). The target, including debt relating to leases, is net debt level not to exceed USD 700-800 million
Debt and facilities as of December 31, 2018:

*Carve out for drawings under ECF and RCF

### Debt maturity profile:

- **Japanese Export Credit**
- **Term Loan B**
- **Senior Notes**
- **Revolver drawn**

![Debt maturity profile chart](chart.png)
Solid Headroom to Maintenance Covenant

- Sharp reduction of Total Leverage Ratio (“TLR”) during 2018
  - Significant headroom to required level

- TLR of 2.58:1 as of December 31, 2018, compared to 3.67:1 as of December 31, 2017

- Expect TLR to reduce further in 2019 with good compliance headroom

- TLR calculation not impacted by IFRS 16
Sale of *Ramform Sterling*

- In process of completing sale of *Ramform Sterling* to JOGMEC, including a service agreement of up to 10 years with annual renewals

- Vessel sales agreement signed
  - To be delivered April 2019

- Sales price of ~USD 100 million, excluding streamers
  - Significant 2019 cash flow contribution with ~75% to be paid at delivery
  - Price exceeds net book value, supportive for vessel valuations

- *Ramform Vanguard* will be reintroduced from summer 2019 to maintain operated fleet size
Cash Flow Generation Set to Improve

2019 key cash flow drivers*)

- **2019 cash flow set to improve**
  - Contract pricing
  - More capacity allocation to contract services
  - Vessel utilization
  - Sale of *Ramform Sterling*
  - Lower scheduled debt installments

*) The illustration of 2019 cash flow drivers is based on analyst consensus for revenues and is a simplified illustration that does not take into account working capital changes or other operating payments or receipts than those specifically shown. Taxes are based on actual taxes paid in 2018.
Well Positioned to Refinance in 2019

**Improved financial position**
- Improving market fundamentals
- Healthy cash flow generation
- Strong improvement of financial ratios
- Adequate liquidity position
- Proceeds from sale of *Ramform Sterling*

**Access to capital markets**
- Established in Term Loan and international Bond market
- Credit rating from Moody’s and Fitch
- Constructive RCF bank group

**Timing**
- Still 23 months to first capital markets debt maturity
- Likely to refinance in 2019
- Positioned to execute on short notice
- Timing and structure dependent on market conditions/cost
2019 Gross Cash Costs
- Positioned for growth, while cost control remains priority

- 2019 gross cash costs expected at ~USD 550 million*
  - Down from USD 601.6 million in 2018

- IFRS 16 to be implemented January 1, 2019
  - Reduces 2019 gross cash costs by ~USD 50 million

- Cost increase from higher expected operating activity in 2019 offset by full year effect of cost reductions
  - Assuming 7 vessels in operation in Q4 2019

- Tight overall cost control is a priority

---

* Based on NOK/USD exchange rate of 8.56 and Brent spot price of approximately $60 per barrel.
Full year 2018 CAPEX of USD 42.5 million

2019 CAPEX plan of ~USD 85 million
- USD 25 million to reactivate Ramform Vanguard
- USD 8 million for scrubber installation on two Ramform Titan-class vessel

Gross depreciation cost expected to be ~USD 215 million*) in 2019
- Approx. USD 100 million to be capitalized as part of MultiClient investments

*) Includes an estimated increase of ~USD 40 million due to implementation of IFRS 16 – Accounting for leases
Pre-funding (as a percentage of MultiClient cash investments) targeted to be in 80-120% range

2018 MultiClient cash investments of USD 277.1 million with a pre-funding level of 102%

MultiClient cash investments in 2019 expected to be ~USD 250 million*)

More than 50% of 2019 active 3D fleet capacity currently planned for MultiClient

High MultiClient acquisition activity in Q1 2019 with lower than average pre-funding level

2019 MultiClient amortization expense expected to be in the range of USD 375-400 million

*) Includes the estimated impact of implementation of IFRS 16 – Accounting for leases, which is an estimated reduction of ~USD 20 million compared the historical accounting practice
**PGS’ Tax Position**

- **Tonnage Tax regimes**
  - PGS’ Ramform Titan-class vessels are operated within the Norwegian tonnage tax regime

- **Current tax/cash tax has typically been in the range of USD ~10-35 million annually**
  - Mainly withholding taxes and local taxation in countries of operation where PGS has no tax losses to carry forward
  - Will vary depending on area of operation
  - Substantial increase of Brazil library revenues drives cash tax increase in 2018

- **Substantial deferred tax assets**
  - 100% valuation allowance
A significant portion of operating payments (cash cost and CAPEX) is in non USD currencies
- A 10% change of USD vs. NOK has an annual net EBIT impact of USD 12-15 million.
- A 10% change of USD vs. GBP has an effect of USD 5-7 million

The Company’s hedging decisions take into account correlations between operating environment and currency fluctuations
- Net short term monetary positions in non USD currencies
- Specific material firm commitments

Leasing commitments in NOK will generally not be hedged
Financial Priorities
- Profitability before growth
- Return on Capital Employed
- Debt reduction

Expect to significantly expand cash flow in 2019

Well positioned to refinance in 2019

Cost and CAPEX discipline

Supporting Exploration, Optimizing Production

Sales, Marketing & Imaging
Nathan Oliver (EVP)
Outline

- Industry activity & global demand outlook 2019
- Streamer market segmentation
- 4D market development and PGS’ strategic pivot
- Imaging, supporting our drive towards the premium market segments
Industry Activity is Set to Increase in 2019

- Total activity in 2018 was similar to 2017, and below maximum industry capacity which resulted in idle time.

- 2019 activity levels are expected to be some 10-15% higher based on project pipelines. We expect the anticipated industry fleet will be close to full utilization from Q2 onwards.

- The capacity allocation split between Contract and MultiClient for the industry is expected to be similar to 2017-2018 at approx. 45/55%.

- Total industry capacity declined somewhat during 2018 as a result of further vessel retirements from the active market.

- We anticipate reactivation of stacked vessels in 2019, which will be dependent on demand build driving improved pricing.
Growing Global Demand Outlook for 2019

**Eastern Atlantic**

**North West Europe**: Norway continues to be very active, as seen from the recent record APA awards. The UK market is coming back to life with positive signs of capital investment returning, stimulated by fiscal and regulatory initiatives. Strong 4D activity in both

**North West Africa**: Continued focus area for 2019. Upsurge in bid rounds as countries position themselves to attract investment driving exploration seismic activity.

**Transform Margin**: Ghana, Togo & Benin following hot on the heels of Cote d’Ivoire, targeting license rounds.

**West Africa**: Angola sees a significant increase in activity expected to continue through 2019; bid round anticipated to open late 2019. In Congo & Gabon, license rounds are underway. MultiClient and Contract opportunities.

**Western Atlantic**

**Canada**: Continued strengthening in this developing market into 2019, mostly MultiClient. Several nfw’s anticipated in 2019 and beyond.

**Gulf of Mexico**: MultiClient dominated market that has been impacted by the deep-water hiatus and more recently AMLO in Mexico causing uncertainty. Stabilization of the oil price should see an exploration up-turn on the US side.

**Latin America**: Large discoveries in Guyana have driven Contract work in recent years. Work outside Guyana depends on drilling success in Colombia, Surinam and French Guiana.

**Brazil**: Several large 4D Contract projects to commence late 2019; significant MultiClient interest and activity, new acquisition and rejuvenation of existing library; permitting challenges continue however.

**Mediterranean**

**East Med**: Continued interest in the region following further drilling success in Cyprus. License rounds (Egypt, Lebanon, Greece), driving a new phase of exploration activity. Both MultiClient and Contract.

**Asia Pacific**

**Malaysia**: Continued strengthening in this into 2019 with extension of the MultiClient concept and Contract activity.

**Indonesia**: Continued focus area for 2019 with good customer interest for new MultiClient seismic.

**Australia**: Uptick in activity from the lows of 2018 driven by gas focused brownfield/nearfield exploration activity.
 Some industry under-supply is likely mid-year due to an active Northern Hemisphere season on the back of recent years’ decline in capacity

 We anticipate some surveys will be pushed out to later in the year which could help support Q4 utilization and rates

 Industry backlog is increasing resulting in improved utilization and efficiency causing day rates to trend upwards in response
Contract Streamer Seismic is Moving Towards the Reservoir (4D)

**Premium segment defined by**
- Close to the reservoir
- High density/high resolution data
- Larger streamer counts, larger vessels and smaller streamer separations
- Preference for true broadband multi-sensor

**MC segment defined by**
- Shift of exploration Contract activities to MultiClient model
- Integrated offering enables economy of scale to deliver cost efficient premium quality
- End user has greater influence on purchase

**Commodity segment defined by**
- Smaller streamer counts, smaller vessels
- Triple source configurations
- Conventional systems adequate
- Heavily price driven
The Premium 4D Streamer Segment is Growing Strongly

2019 is expected to be the highest ever 4D share of total Contract activity:

- Growing adoption in regions outside of traditional areas of North Sea, Brazil and Angola
- 27 towed streamer 4D surveys tendered or planned for 2019 so far – the most ever

There is steady increase in the use of GeoStreamer® multi-sensor technology for 4D’s:

- 4D surveys shot with multi-sensor baselines, generally remain multi-sensor through the 4D campaign life-cycle
- Multi-sensor technology is the only broadband technology generally approved for 4D work by all majors
The 4D market is growing faster than the market in general, and yields enhanced returns:

- Contract rates booked to date are 35% higher than average rates in 2018
- Contract capacity currently 54% booked
- 90% of bookings are 4D, in line with our strategic ambition

PGS’ 4D offering is driven by strong differentiation:

- Multi-sensor technology on all vessels
- Large, high density streamer spreads
- Only player with integrated development of acquisition and imaging tools for 4D/reservoir seismic

Number of companies that have applied 4D to one or more of their fields has grown steadily over the last ten years, and is set to increase again in 2019
A joint acquisition and imaging strategy with ambition to image all that we acquire:

- Leveraging our technology lead in multi-sensor GeoStreamer processing with unique MultiClient high-end technology offerings, and focus on 4D leadership

- Continuing value driven asset rejuvenation of our MultiClient library

- Reducing turnaround time and increasing productivity through digitalization solutions focused on Cloud computing, Machine Learning and Artificial Intelligence
Summary

- 2019 global demand outlook is strong and driving increased activity levels of 10-15%, with industry under-supply anticipated mid-year

- The 4D market is growing and in 2019 is expected to be the highest ever by share of Contract activity, ~45%, providing great scope for technology and operational differentiation

- Good visibility for 2019 in the Contract segment with significantly higher rates achieved to date versus 2018

- PGS is a uniquely integrated player with market leading acquisition and imaging technology
Supporting Exploration, Optimizing Production

New Ventures
Berit Osnes (EVP)
Outline

- Only Remaining Fully Integrated Seismic Provider
- A balanced and diversified data library for growth
- 2019 License Round drivers
- 2018 MultiClient performance
- High performance teams, tuned to the challenge
- Full control of acquisition and imaging technology, capacity and timing
- Consistent quality of services and data
- Full flexibility on business models
- MultiClient access to capacity at cost

2018 Projects and 2019 License Round Drivers for PGS Revenues

- License Rounds with PGS data
- PGS acquisition project
- PGS reprocessing project

**West Africa**
Many countries are planning to have license rounds in 2019, including Angola, Congo and Ghana.

**US GoM**
Continued BOEM lease sales – 252 and 253

**Brazil**
16th Regular Round and 6th Pre-salt Round plus new Permanent Offer bid rounds

**Canada**
Jeanne d’Arc, SE Newfoundland and Labrador South call for bids

**North Sea and Barents Sea**
Both the UK and Norway have annual license rounds that offer up blocks in high-activity areas.

**East Mediterranean**
Blocks offered in the Lebanon License Round and Egypt is expected to offer blocks in the Western offshore

**Malaysia**
Blocks on offer in Sabah round

**West Africa**
Many countries are planning to have license rounds in 2019, including Angola, Congo and Ghana.
PGS MultiClient Performance: Peer Group Comparison

Net book value

Revenues (LTM)

Cash Investments

Strong prefunding over the cycle

Solid and stable revenue / investment ratio
2018 delivered strong revenues and a good portfolio of projects for future growth

MultiClient will benefit from PGS being the only fully integrated seismic provider

2019 MultiClient cash investment ~ $250 million

Target revenue / cash investment ~ 2.5 over time from balanced and geographically diverse data library
Outline

- Safety and vessel performance 2018
- Fleet overview
- Strengths of PGS fleet
- Meeting the IMO regulation change in 2020
- Advantages of PGS technology platform and project skills
- Status of streamer inventory
- New differentiating technology
HSEQ Performance: Among Industry Leaders

Operational safety is PGS’ number 1 priority – protecting our crews, assets and the environment.

Total Recordable Case Frequency (TRCF)

Per million man-hours

No compromise on safety or operational robustness
A Flexible Fleet

- PGS will have eight 3D vessels ("the active fleet") fully equipped at all times

- If needed, PGS can scale down operations to six vessels and reduce costs including crew accordingly

- *Ramform Vanguard* will replace *Ramform Sterling* from May 2019 – Ramform Vanguard can operate up to 18 streamers and is fully equipped with PGS technology
Maintaining Industry Leading Performance

PGS “Best in Class” fleet performance ensures consistent operating strength at every point in the cycle.

Performance = actual production of seismic in % of available production time

Sharp focus on planning and risk mitigation

Continuous effort to reduce unproductive time
Most Productive Fleet in the Industry

Max streamer capacity:
- Ramform Titan-class: 24
- Ramform S-class: 22
- Ramform V-class: 18
- Sanco vessels: 14
- PGS Apollo: 12

All vessels are capable of towing dual and triple source configurations

Average vessel age: 7 years (Dec. 2018)
Average streamer count: 14

*In normal operating mode.
**Ready to Meet the IMO Regulation Change in 2020**

- From 2020 all ships will have to use fuel oil with a sulphur content less than 0.50% or clean the exhaust gases
- The Ramform Titan-class vessels are designed to accommodate scrubbers
- Two Ramform Titan-class vessels will have scrubbers installed in 2019
- We plan to install scrubbers on the two remaining Ramform Titan-class vessels in 2020
- Scrubbers will allow use of HFO fuel on all Ramform Titan-class vessels – a significant cost advantage

The remaining PGS vessels will use MGO until we have installed onboard treatment capabilities to enable use of low sulphur fuel.
Fleet Strengths

- Modern, safe vessels provide the best working environment
- PGS’ high towing capacity allows flexibility to do all types of jobs from one vessel
- Industry leading engine and propulsion redundancy give safe and robust projects
- Advanced back deck solutions provide high safety and rapid deployment and recovery capabilities
- Digitalization of key equipment enables conditions based maintenance and cost savings
- Modern core fleet of support vessels enables efficient and safe crew changes and at sea fuelling
Utilizing the Capabilities of the Fleet:
60% of PGS 3D Data Acquired with 14 or More Streamers
PGS Technology Platform and Project Execution Skills Deliver Value

- One technology platform means vessels are interchangeable
- Proven Multicomponent streamers enable true broadband data and provide operational benefits
- Steerable devices on streamers enable minimum infill, repeatable surveys, fast turns and efficient deployment & recovery
- Inline solutions reduce drag, fuel consumption, tangling and barnacle growth
- Steerable sources enable exact repetition of source positions – key to 4D surveys
- Automated and sophisticated QC and Processing & Imaging tools support fast project turnaround
- State of the art imaging tools from velocity picking to full waveform inversion give our customers the highest quality seismic data
- Combining our excellent project management capabilities with our technology platforms enables PGS to deliver fit for purpose products, faster and with better margins
No Need for New Streamers in the Next Two Years

- PGS’ fleet of active vessels is fully equipped with GeoStreamers produced between 2008-2018

- GeoStreamer is robust, maintained and can be re-manufactured, extending its useful technical life beyond 10 years

- PGS will not need new streamers before 2021, allowing us to minimize our capex

- PGS is currently developing a new generation streamer which will reduce production cost
eSeismic – A New Way of Acquiring and Processing Marine Seismic Data

- eSeismic is a new acquisition and processing method based on continuous source wavefields and recording
- eSeismic can reduce the environmental footprint because it has a much lower sound emission levels (8 – 22 dB) compared to conventional seismic
- Potential to improve PGS’ acquisition efficiency up to 25%
- Compatible with future marine vibrator technology
- Data quality on par with or better than conventional 3D seismic
Summary

- Strong safety culture continues to yield positive results
- “Best in Class” fleet performance ensures consistent operating strength at every point in the cycle
- Our active fleet is the most productive fleet in the industry
- GeoStreamer enables very low streamer capex through 2020
- PGS continues to develop competitive technologies making acquisition more effective and data quality better

Leveraging digitalization to improve efficiency and reduce cost
Market Perspectives:
Seismic – Early Cycle Indicator with Potential for More

- For the second consecutive year seismic spending has increased Y-o-Y
- MultiClient has already benefitted, while contract activity has lagged
- Contract market trends
  - Higher activity
  - Higher prices
  - Increased share of 4D
- Expect contract pricing to be materially higher in 2019 vs. 2018

*Accumulated revenues for PGS, TGS, CGG, Spectrum and Polarcus. Preannounced numbers for the first four companies and based on consensus for Polarcus.
**Average of estimates from Barclays, DNB and Pareto Securities E&P spending reports.

Source: Rystad Energy and Nordea.
Summary

- Achieved key KPI for 2018 of positive cash flow after debt servicing
- Record high MultiClient late sales in 2018
- Seismic market in recovery
  - Improving cash flow and increasing offshore CAPEX among oil companies
  - Expected to continue in 2019
- PGS will focus on profitability, return on capital employed and reposition the capital structure to sustain future downturns
- Will focus on the MultiClient business, improve 4D position and image what we acquire

Taking leadership position through fully integrated offering
